Secure Delivery Cheat Sheet

Share work securely - without Dropbox, Google Drive, or surveillance traps.

THE BASIC FLOW

Local file → Encrypt it → Upload to safe host → Share disposable link

TOOL STACK OPTIONS

Fast & Easy
- [Wormhole](https://wormhole.app) (https://wormhole.app) - Drag, encrypts in-browser, link expires fast
- [Send](https://send.vis.ee) (https://send.vis.ee) - Simple UI, end-to-end encrypted

TEMPLATE FOR CLIENTS (PLAIN ENGLISH)

"For your privacy and mine, I deliver files using end-to-end encrypted links.
No accounts, no tracking. Just click the link to download. It expires automatically for your safety."

PUBLIC CLOUD VS ENCRYPTED SHARING

	Public Cloud	**Encrypted Share**
Link expires?	Usually No	Yes
Encrypted?	At rest only	End-to-end
Tracks recipients?	Yes	No
Owns metadata?	Always	You retain control

TEST IT YOURSELF

- Upload a test file to Wormhole
- Download it from another device
- Watch it expire and vanish

You're in control now.

Create. Encrypt. Control it all
